About Dataset

Posture Keypoints

The dataset is designed for computer vision and machine learning tasks related to the analysis of the posture of people with a sedentary lifestyle. It consists of images of people in a sitting or standing position, each of which is accompanied by annotations to key points in the YOLO pose format.

The following key points are labeled:

1. The beginning of the cervical spine
2. The beginning of the lumbar spine
3. The beginning of the cervical spine
4. The beginning of the cervical spine
